

Support and comfort on every level.

AirCool® and Gel Foams

In addition to providing pressure relief and support, our AirCool® foam features a channeled design to promote airflow throughout the mattress. A layer of plush comfort foam infused with GelTouch™ adds another measure of pressure relief.

AirCool® Memory Foam

Select models include a layer of AirCool® Memory Foam, which provides exceptional pressure relief, promotes freedom of movement and a comfortable sleeping temperature. Select models also include AirCool® Memory Foam with Micro GelTouch™ for exceptional airflow, heat dissipation, and pressure relief.

TruTemp™ Technology

The Beautyrest® Recharge® World Class® line features a layer of TruTemp™ Gel to help keep you in a comfortable temperature zone. It works by absorbing, storing and releasing excess warmth from the mattress.

Beautyrest® Pocketed Coil® Technology

Our highly advanced Pocketed Coil® Technology provides conforming back support. Hundreds of individually-wrapped springs adjust independently to the weight and contour of your body while offering unmatched motion separation for undisturbed sleep. Select models have Micro Pocketed Coils®, an additional layer of low-profile coils for increased pressure relief and a plush feel.

AirCool® Design

In addition to the unique AirCool® Foams, this design includes our ventilated AirCool® BeautyEdge® Foam Encasement, designed to enhance airflow through the mattress as you sleep while providing comfort all the way to the edge. A hi-tech AirCool® Mesh Border Fabric allows the mattress to breathe so you can sleep more comfortably.
